DEVELOPMENT OF THE BUSINESS

The following is a summary of recent developments since January 2007 in each of the Corporation's areas of business and in the Corporation's corporate and other activities.

Renewable Power Generation

2009 Activity

We transferred the remainder of our directly held Canadian operations to 50%-owned Brookfield Renewable Power Fund in two separate transactions. As part of the transfer, we agreed to purchase the power generated by these facilities at predetermined prices in order to provide increased stability for the fund's operating results. The fund in turn raised C\$760 million in two equity issues, of which we purchased C\$380 million to maintain our 50% ownership interest in the fund. As a result, all of our Canadian renewable energy facilities are now owned by the fund and we generated \$525 million of liquidity. At year-end, the fund had an equity market capitalization, including our 50% interest, of approximately \$1.9 billion.

We entered into a 20-year power sales agreement with the Ontario Power Authority for the previously uncontracted output of our Ontario operations, which is approximately 2,300 gigawatt hours annually including output from the facilities referred to above. The contract has a base price plus an additional amount in respect of on-peak production, both of which escalate annually on a predetermined basis. We are entitled to retain any ancillary revenues such as capacity payments and carbon credits. This agreement increased the amount of generation currently under long-term contract from 51% to approximately 70% and reduces our reliance on shorter-term contracts, consistent with our objectives.

We invested \$120 million during 2009 to expand our operating base through a number of development initiatives including:

- commissioning of two facilities in Brazil with total capacity of 59 megawatts ("MW"). We expect to commission another 26 MW facility in Brazil in the first half of 2010;
- continued advancement of the development of a 50 MW wind energy project in Ontario. We have now secured all of the necessary construction, credit and energy sales agreements to proceed to completion, which is expected at the end of 2010;
- acquisition of our first wind development project in Tehachapi, California. Subject to acquiring long-term power purchase agreements and other approvals, the project has potential capacity of up to 100 MW; and
- execution of an agreement to acquire a 15 MW hydroelectric facility in Maine for \$30 million.

We entered into an agreement to sell our Ontario electric distribution business to FortisOntario Inc., a wholly owned subsidiary of Fortis Inc. for approximately \$68 million.

We completed a number of financing initiatives including:

- C\$700 million corporate notes issued by Brookfield Renewable Power Inc.; and
- \$315 million of project specific financings.

The proceeds were used to refinance existing debt and for general corporate purposes.

2008 Activity

We acquired a 156 MW hydroelectric generating facility on the Itiquira River in Mato Grosso State in central Brazil for a total cost of \$400 million. All the power produced by this facility is sold under a long-term contract expiring in 2014. We also purchased the 18 MW Twin Cities run-of-the-river hydroelectric facility located on the Mississippi River in St. Paul, Minnesota.

We commenced commercial operations at three new hydroelectric facilities in Brazil that have a combined capacity to generate 61 MW of electricity.

2007 Activity

We acquired five facilities in North America with installed capacity of 28 MW at a cost of \$67 million. We also added 13 facilities in Brazil through acquisitions and development at a total cost of \$188 million.

Commercial Properties – Office

2010 Activity – to date

We completed the development of Deloitte Centre in Auckland, New Zealand. The new 23 storey, 23,720 square metre prime office building, which includes some flagship retail on the ground floor, is fully leased to Deloitte & Touche LLP and Bank of New Zealand.

Our North American subsidiary, Brookfield Properties Corporation (“Brookfield Properties”) issued C\$275 million or 11,000,000 Class AAA Preferred Shares, Series N at a price of C\$25.00 per share. Holders of these shares are entitled to receive a cumulative quarterly fixed dividend yielding 6.15% annually for the initial 6 ½-year period ending June 30, 2016, following which, the dividend rate will be reset every five years at a rate equal to the five-year Government of Canada bond yield plus 3.07%.

2009 Activity

We leased 4.6 million square feet in our core North American portfolio during 2009 at an average net rent of \$21.41 per square foot, representing a 24% premium over the expiring leases, leading to increased in-place rent. We continue to manage our portfolios and tenant relationships on a proactive basis which can lead to opportunities to re-lease space for increased yields while minimizing vacancies.

In our commercial office development activities, we concentrated our efforts and capital on properties that were well leased and well advanced in the development process. We completed seven properties in Australia, United States and Canada at a total cost of \$755 million. We have one building under construction in Perth that is 82% pre-leased to BHP Billiton, the world’s largest mining company. Overall, we added 2.1 million square feet to our portfolio and the occupancy of these properties upon completion totaled 92%. On a full year basis, these buildings should add \$53 million of operating income to our earnings.

Brookfield Properties and BPO Properties Ltd. opened Bay Adelaide Centre, a new, 51-storey, 1.2-million-square-foot office tower in downtown Toronto’s financial core, and the first development built to achieve a Leadership in Energy and Environmental Design (LEED) Gold Standard in Toronto’s financial district.

We increased our ownership of a high quality office property portfolio in Australia through the restructuring of A\$520 million of debt issued by a fund in which Brookfield acquired management rights in 2007. Following a breach of the fund’s loan to value covenants in June 2009, we were able to negotiate new terms with the lenders and completed a A\$50 million rights offering which resulted in an increase of Brookfield’s interest to 68%. This fund owns four high quality properties in Sydney and Melbourne totaling 1.9 million square feet of office space that is 99% leased.

Together with Brookfield Properties, the Corporation announced the formation of a \$5 billion consortium (the “Consortium”) dedicated to investing in under-performing real estate. The Consortium will invest in equity and debt in under-valued real estate companies or real estate portfolios where value can be created for stakeholders in a variety of ways, including financial and operational restructuring,

strategic direction or sponsorship, portfolio repositioning, redevelopment or other active asset management. Investments in the Consortium are targeted at corporate property restructurings with a minimum \$500 million equity commitment, and pursued on a global basis, with a focus on North America, Europe and Australasia.

Financings completed during the year totalled \$2.8 billion, including a public offering of \$485 million of Brookfield Properties common shares to minority shareholders. The Corporation concurrently purchased common shares from Brookfield Properties equal to the public offering in order to maintain its 50% voting interest. Brookfield Properties also issued C\$250 million 6.75% rate-reset preferred shares.

Brookfield Properties entered into a joint venture partnership on an office property at 1625 Eye St., NW in Washington, DC. in which it will assume a 90% common membership interest in the building by contributing \$203.4 million, or \$587 per leasable square foot. Brookfield Properties will maintain a 10% common membership interest as well as a preferred interest in the venture, and will retain property management and leasing responsibilities at the building.

We completed a number of debt financing initiatives, including:

- \$750 million of corporate borrowing, bonding and guarantee facilities; and
- over \$2 billion of property-specific mortgage financings.

We received development approval for one of the largest commercial office complexes in Perth, West Australia.

Brookfield Properties sold its 50% interest in TD Canada Trust Tower in Toronto for C\$425 million.

Brookfield Properties completed the disposition of the non-core properties acquired in 2006 from Trizec Properties, Inc. and Trizec Canada Inc.

We completed \$1.2 billion of financings to refinance existing properties.

2007 Activity

The Corporation completed the acquisition of the stapled securities of Multiplex Limited and Multiplex Property Trust (together “Multiplex”). Prior to this acquisition, Multiplex was a diversified owner and property manager based in Australia, with established operations in Australia, New Zealand, the United Kingdom and the Middle East. Multiplex’s assets at the time of acquisition included approximately \$3.6 billion of core office and retail properties within nine funds and a \$3 billion high-quality office portfolio held within the Multiplex Property Trust. The Corporation continues to hold 45% of Acadian.

2009 Activity

We acquired an \$8 billion portfolio of global infrastructure assets consisting primarily of utility and transportation businesses which significantly expanded the breadth of our operations and assets under management in this segment. The acquisition was completed by our principal infrastructure entity, Brookfield Infrastructure Partners L.P. (“Brookfield Infrastructure”), and consists of a 40% interest in the restructured Australian listed entity named Prime Infrastructure (“Prime”) that owns most of the acquired portfolio, as well as a direct 49% interest in a major Australian coal terminal and a 100% interest in a UK port business. Prime owns a diverse portfolio of transportation and utility assets located in Australia, the U.S., the U.K., continental Europe, New Zealand and China. We funded the acquisition with \$1.8 billion of equity, of which \$0.8 billion was funded by other shareholders of Prime, \$0.6 billion was funded by other investors in Brookfield Infrastructure, and \$0.4 billion was funded by us in the form of additional investment in Brookfield Infrastructure. The acquired businesses are largely regulated, with the effect that approximately 80% of our Infrastructure operating cash flows are now generated from businesses that are regulated or underpinned by long-term contracts.

We were awarded a major contract to construct a \$400 million transmission project in Texas, together with our joint venture partner. Construction is scheduled to commence in late 2010 and the project is expected to start contributing to cash flow in early 2013.

In March 2008, Brookfield Infrastructure announced the purchase of certain Ontario Transmission Assets from the Corporation. Shareholders received on January 31, 2008 one partnership unit for every 25 Class A Limited Voting Shares or Class B Limited Voting Shares held at the close of business on January 14, 2008. We significantly expanded our Brazilian residential development business over the past 18 months through two merger transactions and two equity issues. This enabled us to expand into new geographic markets and added greater scale in the middle income market. BUSINESS OF THE CORPORATION

Our Business

Brookfield is a global asset management company with over \$100 billion of assets under management.

Our business strategy is to provide world-class asset management services on a global basis, focused on real assets such as property, renewable power and infrastructure assets. Our business model is simple: utilize our global reach to identify and acquire high quality assets at favourable valuations, finance them effectively, and then enhance the cash flows and values of these assets through our leading operating platforms to achieve reliable attractive long-term total returns for the benefit of our partners and ourselves.

We focus on assets and businesses that form part of the critical backbone of economic activity, whether they generate reliable clean electricity, provide high quality office space in major urban markets, or transport goods and resources to or from key locations. These assets and businesses typically benefit from some form of barrier to entry, regulatory regime or other competitive advantage that provides stability in cash flows, strong operating margins and value appreciation over the longer term.

The majority of our assets are invested in high quality commercial office properties, hydroelectric power generating facilities and infrastructure assets. We also develop commercial and residential properties, conduct restructuring, real estate finance and other investment activities through our special situations group and manage fixed income and equity securities through our public securities operations.

Our business is organized into a number of leading operating groups that we have established over many years, and is comprised of more than 15,000 employees. These groups, with their broad operating capabilities and expertise, enable us to maximize the value of our operating assets, businesses and investments.

We have established a number of private and public entities to enable our clients and other investors to participate with us in the ownership of these assets. Our clients are sovereign wealth funds, pension funds, insurance companies, high net worth individual investors and retail customers on a global basis. This provides us with an important source of additional cash flow and other opportunities to create value that we believe will enable us to increase operating cash flow per share at a faster rate than if we relied solely on deploying our own capital. These activities also provide us with additional capital to pursue a broader range of transactions and expand our operating base without straining our own resources, as well as establishing important relationships with many of the world's premier global investors.

We have two principal financial performance metrics: operating cash flow and total return, both measured on a per share basis. We define total return as the change in underlying value together with distributions to shareholders. Our goal is to achieve cash flow growth and total return over the longer term of between 12% and 15%. (See page 12 of the Corporation's 2009 Annual Report for further information on the non-GAAP measure "cash flow from operations").

Total assets under management at December 31, 2009 were \$108 billion and were underpinned by \$64 billion of capital. We provided approximately \$22 billion of this capital from our balance sheet. Institutions have invested \$24 billion in our public securities portfolios and \$9 billion in our unlisted funds and \$9 billion is represented by the equity of various publicly listed issuers that we own and manage.

We differ from most other asset management companies in three important ways:

- The first difference is the industry leading operating platforms we have built up over many years. Our commitment to maintaining these platforms has enabled us to attract and retain best-in-class people and gives us the capability to maximize the long-term cash flows and values of our assets.
- The second difference is our substantial capital base and the significant amount of capital we have committed to the same investment strategies alongside our clients. This invested capital aligns our interests with our clients, generates substantial cash flows to reinvest and provides a solid capitalization to further enhance our role as a reliable sponsor of investment transactions.
- The third difference is how we seek to benefit from managing assets for our clients and investment partners. The cash flow that we receive from our capital and the breadth of our operations allow us to fund our activities without being overly dependent on large base management fee streams to cover the operating costs that we incur. This enables us to seek returns in the form of equity participations or other long-term interests which typically align well with our clients and co-investors.

Principal Business Activities and Sources of Operating Cash Flows

As at December 31, 2009, we had invested approximately \$22 billion alongside our clients and co-investors. This capital generated \$2.0 billion of operating cash flow and gains during 2009, prior to interest and operating costs.

Our capital is invested primarily in renewable hydroelectric power plants, commercial office properties in central business districts of major international centres and regulated infrastructure assets. These segments, together with cash and financial assets, represent over 70% of our invested capital and contribute to the strength and stability of our capitalization and underlying values.

Asset Management and Other Service Revenues

Asset management revenues include the fees and performance returns that we earn for managing capital on behalf of investment clients. As noted above, we also receive other benefits that are reflected in our operating returns from our various platforms. We also include a broad range of property services, investment banking and construction services which we provide to customers.

Renewable Power Generation

We have one of the largest privately owned hydroelectric power generating portfolios in the world, located on river systems in the U.S., Canada and Brazil. We have chosen to focus on hydroelectric generation because of the long-life, exceptional reliability and low operating costs of these facilities. As at December 31, 2009, we owned and managed 164 hydroelectric generating stations which generate on average approximately 16,000 gigawatt hours of electricity each year. We also own and operate a 189 MW wind energy project as well as two natural gas-fired plants. Overall, our assets have 4,198 MW of generating capacity.

Commercial Properties

We own and manage one of the highest quality commercial office portfolios in the world located in major financial, energy and government centre cities in North America, Australasia and Europe. Our strategy is to concentrate our operations in high growth, supply-constrained markets that have high barriers to entry and attractive tenant bases. Our goal is to maintain a meaningful presence in each of our primary markets in order to maximize the value of our tenant relationships. At December 31, 2009, our portfolio consisted of 166 properties containing approximately 95 million square feet of commercial space, which includes a number of high quality shopping centres in Brazil, the United Kingdom and Australia.

Infrastructure

During 2009, we completed a transaction that significantly expanded the scale of our infrastructure operations. Our infrastructure group now manages approximately \$15 billion of total assets in the following sectors: transportation (ports, rail lines); utilities (electrical and natural gas transmission); and timberlands. Our strategy is to acquire and operate high quality assets and operations that provide essential services or products and which generate cash flows that are supported by regulatory regimes or some form of barrier to entry.

Development Activities

We develop commercial properties on a selective basis, and are active in residential development throughout North America, Australasia, Brazil and the United Kingdom. We also develop agricultural lands in Brazil. These activities encompass 41 million square feet of developable commercial space, 61 million square feet of residential condominiums, 123,000 lots for residential land and 370,000 acres of agricultural land. We also conduct development activities within our renewable power generation and timberland activities.

Special Situations

We conduct a wide range of restructuring, real estate finance and bridge lending activities through investment funds with total committed capital of \$5.0 billion. Total invested capital at year end was \$6.9 billion of which our share was \$1.6 billion. We also hold a number of investments that are mostly temporary in nature and will be sold once value is maximized or integrated into our core operations or new fund strategies.

Public Securities and Advisory Services

We manage fixed income and equity securities for institutional clients with a focus on the real estate and infrastructure asset classes. Assets under management in this segment totalled \$24 billion at year end. We also provide specialized investment banking and transaction advisory services in North America, the United Kingdom and Brazil. The associated revenues are included in asset management revenues. We have minimal capital invested in these activities.

Business Strategy

We are a global asset management company focused on property, renewable power and infrastructure assets. We have spent many years building high quality operating platforms that enable us to acquire, finance and optimize the value of assets for our own benefit, and for our clients whose capital we manage.

We believe that the best way to create long-term shareholder value is to generate increasing operating cash flows and net asset value, measured on a per share basis, over a very long period of time. Accordingly, we concentrate on high quality long-life assets that generate sustainable cash flows, require minimal sustaining capital expenditures and tend to appreciate in value over time. Often these assets will benefit from some form of barrier to entry due to regulatory, physical or cost structure factors. While high quality assets may initially generate lower returns on capital, we believe that the sustainability and future growth of their cash flows are more assured over the long term, and as a result, warrant higher valuation levels. We also believe that the high quality of our asset base protects the company against future uncertainty and enables us to invest with confidence when opportunities arise.

Consistent with this focus, we own and operate large portfolios of hydroelectric power generating stations, office properties, private timberlands and regulated transportation and utility systems that, in our opinion, share these common characteristics. These assets represent important components of the infrastructure that supports the global economy.

We believe the demand from institutional investors to own assets of this nature is increasing as they seek to earn increasing yields to meet their investment objectives. These assets, in our view, represent attractive alternatives to traditional fixed income investments, providing in many cases a “real return” that increases over time, relatively low volatility and strong capital protection. There is a substantial supply of investment opportunities in the form of existing assets as well as the need for continued development in an ever expanding global economy. At the same time, we believe there are relatively few global organizations focused on managing assets of this nature as a primary component of their strategy.

Accordingly, an important component of our long-term strategy for growth is centred around expanding our assets under management, which should lead to increased fee revenues and long-term opportunities to earn performance returns. We plan to achieve this within our existing operating platforms, and by developing and acquiring platforms to operate new asset classes that demonstrate characteristics that are similar to our existing assets. We also plan to achieve growth by expanding our distribution capabilities to access a broader range of investment partners, thereby increasing our access to capital. This increased capital, when coupled with new investment opportunities, should increase our assets under management and the associated income as well as direct investment returns, thereby increasing shareholder value.

Capabilities

We believe that we have the necessary capabilities to execute our business strategy and achieve our performance targets. We focus on disciplined and active hands-on management of assets and capital. We strive for excellence and quality in each of our core operating platforms in the belief that this approach will produce superior returns over the long term.

We endeavour to operate as a value investor and follow a disciplined investment approach. Our management team has considerable capabilities in investment analysis, mergers and acquisitions, divestitures and corporate finance that enable us to acquire assets for value, finance them effectively, and to ultimately realize value created during our ownership.

Our operating platforms and depth of experience in managing these assets differentiate us from some competitors that have shorter investment horizons and more of a financial focus. Over time we have established a number of high quality operating platforms that are fully integrated into our organization. This has required considerable investment in building the management teams and the necessary resources; however, we believe these platforms enable us to optimize the cash returns and values of the assets that we manage.

We have established strong relationships with a number of leading institutions and believe we are well positioned to expand our sources of co-investment capital and clients. In order to expand our assets under management, we are investing in our distribution capabilities to encourage existing and potential clients to commit capital to our investment strategies. We are devoting expanded resources to these activities, and our efforts continue to be assisted by strong investment performance.

The diversification within our operations allows us to offer a broad range of products and investment strategies to our clients. We believe this is of considerable value to investors with large amounts of capital to deploy. In addition, our commitment to transparency and governance as a well-capitalized public company listed on major North American and European stock exchanges positions us as a desirable long-term partner for our clients.

Finally, our commitment to invest a meaningful amount of capital alongside our investors creates a strong alignment of interest between us and our investment partners and also differentiates us from many of our competitors. Accordingly, our strategy calls for us to maintain considerable surplus financial resources relative to other managers. This capital also supports our ability to commit to investment opportunities on our own account when appropriate or in anticipation of future syndications.

Financing Approach

The strength of our capital structure and the liquidity that we maintain enable us to achieve a low cost of capital for our shareholders and at the same time provide us with the flexibility to react quickly to potential investment opportunities and adverse changes in economic circumstances, such as we have witnessed over the past 18 months.

The following are the key elements of our capital strategy:

- Match fund our long-life assets with long-duration mortgage financings with a diversified maturity schedule;
- Provide recourse only to the specific assets being financed, with limited cross collateralization or parental guarantees;
- Limit borrowings to investment grade levels based on anticipated performance throughout a business cycle;
- Structure our affairs to facilitate access to capital and liquidity at multiple levels of the organization; and
- Maintain access to a broad range of financing markets.

As a result of the foregoing, most of our borrowings are in the form of long-term, property-specific financings such as mortgages or project financings secured only by the specific assets. The diversification of our maturity schedule means that financing requirements in any given year are manageable. Limiting recourse to specific assets or business units ensures that weak performance by one asset or business unit does not compromise our ability to finance the balance of the operations.

Our focus on structuring financings with investment grade characteristics ensures that debt levels on any particular asset or business can typically be maintained throughout a business cycle, and also enables us to limit covenants and other performance requirements, thereby reducing the risk of early payment requirements or restrictions on the distribution of cash from the assets being financed. Furthermore, our ability to finance at the parent, operating unit, and asset level on a private or public basis means that we are not overly dependent on any particular segment of the capital markets or the performance of any particular unit.

To enable us to react to attractive investment opportunities and deal with contingencies when they arise, we typically maintain a high level of liquidity at the corporate level and within our key operating platforms. Our primary sources of liquidity, which we refer to as “core liquidity,” consist of our cash and financial assets, net of deposits and other associated liabilities, and undrawn committed credit facilities.

We generate substantial liquidity within our operations on an ongoing basis through our operating cash flow, which typically exceeds \$1.5 billion on an annual basis, as well as from the turnover of assets with shorter investment horizons and periodic monetization of our longer-dated assets through sales, refinancings or co-investor participations. Accordingly, we believe we have the necessary liquidity to manage our financial commitments and to capitalize on opportunities to invest capital at attractive returns. Nevertheless, we are cognizant of the current instability in the capital markets and continue to place a premium on liquidity and allocate capital in a cautious manner.

For information about environmental policies and risk factors related to the Corporation and its business, reference is made to the section entitled "Business Environment and Risks" on pages 68 to 80 of Management's Discussion and Analysis in the Corporation's 2009 Annual Report (the "Annual Report") which is available on SEDAR at www.sedar.com. SOCIAL AND ENVIRONMENTAL POLICIES

Commercial Properties

As a leader in the commercial real estate industry, we are committed to owning, developing and managing premier office properties that are sustainable, environmentally friendly and technologically advanced. We intend to build all our future developments to a LEED® (Leadership in Energy and Environmental Design) Gold standard or local equivalent. The LEED® Green Building Rating System is an internationally accepted scorecard for sustainable sites, water efficiency, energy and atmosphere, materials and resources, and indoor environmental quality. In addition, we continue to expand and enhance the features, systems and programs that foster energy efficiency in our existing buildings, as well as the health and safety of all of our tenants, employees and the community. We perform regular, comprehensive environmental reviews and upgrades at our properties and endeavor to maximize energy efficiency at every building. Our goal is to provide the highest-quality office space for our tenants while also reducing operating costs and the impact on the environment over the full lifecycle of the property.

We are firmly committed to the continuous improvement of energy performance and the sustainability profile of our North American office portfolio, both within existing buildings and in new developments. Each of our properties undergoes routine, comprehensive environmental reviews and upgrades. Renovations are undertaken with the most environmentally conscious products reasonably available. The goal is to provide high quality office space while reducing operating costs. Energy efficiency is one of our top priorities.

We have a three-pronged strategy toward achieving maximum sustainability and energy conservation in our office assets:

1. Incorporate innovative energy conservation strategies to achieve best-in-industry environmental performance in all new office developments;
2. Capitalize on opportunities to redevelop, retrofit, redesign and renovate properties within the existing portfolio to realize maximum energy efficiency and reduction in carbon footprint; and
3. Take leadership positions in green industry organizations and undertake new initiatives that foster the sustainability of commercial properties.

We intend to build all new developments to a LEED Gold standard and we have achieved LEED certification at eight properties within our existing office portfolio.

Renewable Power Generation

We have health and safety and environmental policies in place in connection with our power generating and transmission operations that require all employees, contractors, agents and others involved to comply with established safety, health and environmental practices. We strive to achieve excellence in safety performance and to be recognized as an industry leader in accident prevention. Our overall objective is to incur zero high risk safety incidents and zero lost time injuries. Our environmental practices are based on fundamental values of accountability, partnership and open communication. We endeavour to manage natural resources in ways that ensure sustainable development. Our approach protects and enhances the ecosystems and communities affected by our activities. We are committed to the environmentally responsible management of our assets. Developments undertaken have all obtained their required environmental authorizations from the appropriate regulatory authorities. We pay particular attention to dam safety. Inspections and independent evaluations of our dams and other hydroelectric structures are periodically conducted, and repairs and upgrades are made to any elements or design features as may be required from time to time. Public safety is also one of our primary concerns. We endeavour to keep the lands and waterways we use for our operations safe for the general public. We also conduct information sessions for the general public to educate them of the dangers of using land and waterways of hydroelectric generating facilities for recreational purposes.

Timberlands

Our timberlands operations are fully regulated by federal, state and/or provincial laws, which, in many cases, are more rigorous than those required under the various forest practices certification schemes. It is our intent that all timberlands owned and/or managed by us will become certified under a Programme for the Endorsement of Forest Certification schemes ("PEFC"), with PEFC being a globally recognized certifier of certifiers. The standards under which our timberlands are certified all meet the standards defined by PEFC and are PEFC certified. This provides assurance to purchasers of wood and paper products that they are supporting the sustainable management of forests. We view these policies and procedures as standard best operating practices and we treat all related costs as direct business costs within each operation.

Development Activities

We are subject to local, state, provincial and federal laws and regulations concerning the protection of the environment in connection with our development properties. For instance, the environmental laws that apply to a given homebuilding site depend upon the site's location, its environmental conditions and the present and former uses of the site and its adjoining properties. Environmental laws and conditions may result in delays, or cause us to incur substantial compliance and other costs, and can prohibit or severely restrict homebuilding activity in environmentally sensitive regions or areas.

None of the Corporation's directors or executive officers own directly any of the Corporation's Class B Limited Voting Shares.

Mr. Lawson served as a director of American Resource Corporation Limited ("ARCL") until April 2005. During that time, ARCL failed to file financial statements on a timely basis, and accordingly ARCL and its directors and officers became subject to management cease trade orders imposed by the Ontario Securities Commission and other provincial securities regulatory authorities. The Corporation controls all of the voting and 99% of the non-voting shares of ARCL. ARCL has corrected the filing deficiencies that led to the management cease trade orders and has made application to the relevant provincial securities regulatory authorities to have the management cease trade orders, which are still in effect, lifted.

The declaration and payment of dividends on the Corporation’s Class A Limited Voting Shares and Class B Limited Voting Shares are at the discretion of the Board of Directors. Dividends on the Class A Limited Voting Shares and Class B Limited Voting Shares are paid quarterly, normally at the end of February, May, August and November of each year. The Board of Directors supports a stable and consistent dividend policy for these shares, and will consider increasing dividends from time to time at a rate based on a portion of the growth rate in cash flow from operations per share. Special dividends may also be declared from time to time to implement corporate strategic initiatives.

On February 7, 2008, the Board of Directors approved an increase to the quarterly dividend paid on its Class A Limited Voting Shares and Class B Limited Voting Shares from \$0.12 to \$0.13, commencing with the dividend paid on May 31, 2008.

On January 3, 2008, the Board of Directors announced a special dividend of 25 units of Brookfield Infrastructure for each Class A Limited Voting Share or Class B Limited Voting Share held at the close of business on January 14, 2008. This special dividend was distributed to the holders of Class A Limited Voting Shares and Class B Limited Voting Shares on January 31, 2008, and the Brookfield Infrastructure units commenced trading on the NYSE on that date. Fractional units were paid in February 2008 in cash at the rate of \$20.5565 per unit, which was the weighted average trading price of the partnership units on the NYSE for the five trading days following the commencement of trading.

On June 1, 2007, the Corporation completed a three-for-two stock split of its Class A Limited Voting Shares by way of a special dividend of one Class A Limited Voting Share for each two Class A Limited Voting Shares or Class B Limited Voting Shares held at the close of business on May 24, 2007. On February 8, 2007, the Board of Directors approved an increase to the quarterly dividend paid on its Class A Limited Voting Shares and Class B Limited Voting Shares from \$0.16 to \$0.18, expressed on a pre-split basis, commencing with the dividend paid on May 31, 2007. On a post-split basis, reflecting the three-two-stock split on June 1, 2007, this increased dividend was \$0.12.

Increases to the quarterly dividends paid on the Corporation’s Class A Limited Voting Shares were approved in each of the three prior years, namely an increase from \$0.15 to \$0.24 in February 2006, an increase from \$0.14 to \$0.15 in February 2005, and an increase of C\$0.25 to C\$0.26 in February 2004. The quarterly dividends shown for these prior years are shown as declared, that is, prior to the impact of the three-for-two stock splits in June 2004, April 2006 and June 2007.

In April 2004, the Board of Directors decided to change the declaration currency for the dividend payable on its Class A Limited Voting Shares and Class B Limited Voting Shares from Canadian to U.S. funds, commencing with the dividend paid on August 31, 2004 of \$0.14 per share. Registered Canadian shareholders receive their dividends in Canadian funds, unless they elect otherwise. This declared dividend was also pro-rated to reflect the three-for-two stock split implemented in June 2004.

The Corporation has a Dividend Reinvestment Plan which enables registered holders of Class A Limited Voting Shares who are resident in Canada to receive their dividends in the form of newly issued Class A Limited Voting Shares. The price of the new shares is equal to the weighted average price at which board lots of Class A Limited Voting Shares have traded on the TSX during the five trading days immediately preceding the relevant dividend payment date. Our Dividend Reinvestment Plan allows current shareholders of the Corporation who are resident in Canada to increase their investment in the Corporation free of commissions.

AUDIT COMMITTEE INFORMATION

Responsibilities of the Audit Committee

The Corporation’s board of directors has established an Audit Committee with the responsibility for monitoring the Corporation’s systems and procedures for financial reporting, risk management and internal controls, for reviewing all public disclosure documents containing financial information, and for monitoring the performance of the Corporation’s external and internal auditors. The responsibilities of the Audit Committee are set out in a written charter, which is reviewed and approved annually by the board of directors. The current Charter of the Audit Committee was reviewed and confirmed by the board on February 17, 2010 and is set out in full in Appendix C to this Annual information Form.

Composition of the Audit Committee

As at the date of this Annual Information Form, the Audit Committee is comprised of the following four directors: Marcel R. Coutu, who is the Committee’s chairman; Jack M. Mintz; Patricia M. Newson; and George S. Taylor. The Corporation’s board of directors has determined that all of these directors are independent and financially literate, and that Mr. Coutu, Ms. Newson and Mr. Taylor each qualify as an “audit committee financial expert”. Mr. Coutu has a Masters Degree in Business Administration and over 15 years’ experience in investment banking and corporate finance. He is currently President and Chief Executive Officer of Canadian Oil Sands Limited. Ms. Newson is a Chartered Accountant with over 25 years’ experience in finance in the energy and utility industries. She is currently President and Chief Executive Officer of AltaGas Utility Group Inc. and the former Senior Vice-President Finance and Chief Financial Officer of AltaGas Income Trust. Mr. Taylor is a Certified Management Accountant and has extensive financial and senior management experience with a public company as an executive of John Labatt Limited from 1977 to 1995. He has served as an audit committee member and audit committee chairman for a number of public companies and non-profit organizations during his business career. Mr. Mintz has had an extensive academic career in business economics and taxation and has served on the boards and audit committees of several public companies and non-profit organizations.

Additional information on the members of the Audit Committee is contained in the Circular.

Principal Accountant Fees and Services

Deloitte and Touche LLP, the member firms of Deloitte Touche Tohmatsu and their respective affiliates (collectively “Deloitte & Touche”) are the principal external auditors of the Corporation and its consolidated reporting issuer subsidiaries. The following table provides information about the aggregate fees billed to the Corporation and its consolidated subsidiaries for professional services rendered by Deloitte & Touche during 2009 and 2008:

YEARS ENDED DECEMBER 31 (MILLIONS)	2009			2008		
	Brookfield	Subsidiaries of Brookfield	Total	Brookfield	Subsidiaries of Brookfield	Total
Audit fees	\$ 3.5	\$ 19.4	\$ 22.9	\$ 4.0	\$ 15.3	\$ 19.3
Audit-related fees	0.8	6.1	6.9	0.1	8.4	8.5
Tax fees	—	0.5	0.5	0.1	0.7	0.8
All other fees	0.1	0.5	0.6	0.2	0.3	0.5
Total	\$ 4.4	\$ 26.5	\$ 30.9	\$ 4.4	\$ 24.7	\$ 29.1

Audit Fees. Audit fees include fees for services that would normally be provided by the external auditor in connection with statutory and regulatory filings or engagements, including fees for services necessary to perform an audit or review in accordance with generally accepted auditing standards. This category also includes services that generally only the external auditor reasonably can provide, including comfort letters, statutory audits, attest services, consents and assistance with and review of certain documents filed with securities regulatory authorities.

Audit-Related Fees. Audit-related fees are for assurance and related services, such as due diligence services, that traditionally are performed by the external auditor. More specifically, these services include, among others: assistance in preparing for the requirements of Section 404 of the Sarbanes-Oxley Act of 2002, employee benefit plan audits, due diligence related to mergers and acquisitions, accounting consultations and audits in connection with acquisitions, attest services that are not required by statute or regulation, and consultation concerning financial accounting and reporting standards.

Tax Fees. Tax fees are principally for assistance in tax return preparation and tax advisory services.

All Other Fees. All other fees include fees for translation, litigation and advisory support services.

Pre-Approval Policies and Procedures

The Audit Committee of the Corporation’s board of directors has adopted a policy regarding the provision of services by its external auditors, currently Deloitte & Touche. This policy requires audit committee pre-approval of all permitted audit, audit-related and non-audit services. It also specifies a number of services that may not be provided by the Corporation’s external auditors, including all services prohibited by law from being provided by the external auditors.

Under the policy, all permitted services to be provided by the external auditors must be pre-approved by the Audit Committee or a designated member of the Audit Committee. Any pre-approval granted by a designated member must be reported to the Audit Committee at its next scheduled meeting. The pre-approval of services may be given at any time up to a year before commencement of the specified service.

The Audit Committee may delegate its pre-approval authority and responsibility to the audit committee of any consolidated subsidiary of the Corporation in respect of services to be provided to such subsidiary, provided that such subsidiary’s audit committee members are independent from the Corporation and its management, such subsidiary adopts pre-approval policies and procedures that are substantially similar to those of the Corporation, and such subsidiary’s audit committee makes certain reports to the Corporation’s audit committee.

Subject to the above mentioned policy, the Audit Committee may establish fee thresholds for a group of pre-approved services, provided that such fees will, when combined with all such fees that have not been specifically approved by the audit committee, aggregate less than 25% of the anticipated audit fees for the Corporation and its subsidiaries for the same year. In such cases, the description of services must be sufficiently detailed as to the particular services to be provided to ensure that (i) the Audit Committee knows precisely what services it is being asked to pre-approve and (ii) the Audit Committee’s responsibilities are not delegated to management. All such services will be ratified at the next scheduled meeting of the Audit Committee, and upon such ratification will no longer be included in determining the aggregate fees covered by this limited approval.

Of the fees reported in this Annual Information Form under the heading “Principal Accountant Fees and Services”, none of the fees billed by Deloitte & Touche were approved by the Audit Committee of the board of directors of the Corporation pursuant to the de minimis exception provided by Section (c)(7)(i)(C) of Rule 2-01 of Regulation S-X.

The sole holder of the Class B Limited Voting Shares of the Corporation is a party to a trust agreement with Computershare Trust Corporation of Canada (formerly, Montreal Trust Corporation of Canada) (as trustee for the holders of the Corporation's Class A Limited Voting Shares) dated August 1, 1997.
